

RFC-related data for CIP
and timelines for their collection

Ljubljana, 19 February 2019

Types of RFC-related data required for implementation of CIP on a new RFC

» Basic / ground topology:

- » CIP nodes belonging to the RFC 
- » CIP segments (sections) of the RFC 
- » Connection to terminals along the RFC 

» Additional topology-related information:

- » Visibility of CIP nodes in the interactive map 
- » Detailed geometries of CIP segments 
- » Line properties concerning CIP segments 
- » Detailed information on terminals 

» Other information : **Already approved developments**

- » Documents for the common document structure 
- » Projects and ETCS 

Timelines for collection of CIP-related data in CIP (with RFCs 6 & 7 in 2018)
