1. Introduction

According to Art. 2.2 c of Regulation (EU) 913/2010, the terminal is defined as:

installation provided along the freight corridor which has been specially arranged to allow either the loading and/or the unloading of goods onto/from freight trains, and the integration of rail freight services with road, maritime, river and air services, and either the forming or modification of the composition of freight trains; and, where necessary, performing border procedures at borders with European third countries.

In accordance with Art. 18b of Regulation (EU) 913/2010 the Management Board shall draw up, regularly update and publish a Corridor Information Document.

Corridor Information Document - Book 3 Terminal Description as its part, containing information on the list and characteristics of terminals, in particular information concerning the conditions and methods of accessing the terminals.

This document provides the customers the information about terminals on RFC Amber in a way of list for each country. For detailed information the customers shall visit the terminal's web page.
